***Allowable Subject Matter***

1. Claims 1-4 allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art, taken alone, or in combination, fails to teach the specifics of claims 1-4.

Tone, US 5,596,493, teaches a method for predicting sales volume and determining an optimum restocking order, but does not explicitly teach the replenishment based on a benchmark comprising projecting sales for one year in the future, wherein the first plurality of products is 8457 in number and projecting sales for one year in the future in a second time period, wherein the plurality of second products is 34,500 in number. The product history records are 720,000 in number and there is a net change for only said first plurality of products wherein the projected sales are determined in accordance with the benchmarks and at least one of the first time period and second time period is less than 30 minutes.

Eder, US 5,615,109 teaches creating detailed, multidimensional forecasts of sales that are adjusted to exactly match a controlling forecast. A profit maximized requisition set is then created that utilizes vendor and unit of measure substitution, but does not explicitly teach the replenishment based on a benchmark comprising projecting sales for one year in the future, wherein the first plurality of products is 8457 in number and projecting sales for one year in the future in a second time period, wherein the plurality of second products is 34,500 in number. The product history records are 720,000 in number and there is a net change for only said first plurality of products wherein the projected sales are determined in accordance with the

benchmarks and at least one of the first time period and second time period is less than 30 minutes.

Lee et al, US 5,712,985 teaches demand forecasting and production scheduling that creates production schedules for various business items in a number of future time intervals, but does not explicitly teach the replenishment based on a benchmark comprising projecting sales for one year in the future, wherein the first plurality of products is 8457 in number and projecting sales for one year in the future in a second time period, wherein the plurality of second products is 34,500 in number. The product history records are 720,000 in number and there is a net change for only said first plurality of products wherein the projected sales are determined in accordance with the benchmarks and at least one of the first time period and second time period is less than 30 minutes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
